Re: No. 96-G-0201; *Hercules Marine Services Corporation v. Bob Casale*; in the 239th
Judicial District Court of Brazoria County, Texas
Your Ref.: 704-34

Dear Larry:

Pursuant to your request for copies of the permits held by Hercules Marine Services Corporation ("HMSC"), enclosed are copies of assignments of permits from the old Hercules Offshore Corporation to the new HMSC. The permits assigned to HMSC were originally assigned in the name of Hercules Real Estate Corporation, which subsequently changed its name to HMSC. Notifications of the name change were sent to the various permit issuers at the time of the name change.

We do not have the original permits but are checking our off-site files to see if we have copies of those permits. At the time of the acquisition, we received copies of the permits from the HMSC Freeport office. I'm surprised that these permits cannot be found, as they should be in Freeport.

Finally, we enclose a copy of additional information received from Larry Ballinger regarding the NPDES General Permit for Storm Water Discharges Associated with Industrial Activity.

If you have any questions regarding the permits, please do not hesitate to contact us. We will let you know if we locate copies of the permits in question.

Very truly yours,

M. A. Nunes/rmo

Attention: Exemption Status Board
SUBJECT: Amendment to Permit # X13561

Dear Sir:

In January 1989 Hercules Offshore Corporation purchased property in Freeport, Texas from Fish Engineering. The property is located on the Intracoastal Waterway at mile marker 93. The geographical coordinates of the facility are 28° 58' 05" north latitude and 95° 17' 26" west longitude.

Hercules notified TACB in February 1989 of the change in ownership and the TACB transferred the permit exemption # X13561 to Hercules Offshore.

During the 1989 sales transaction, Hercules chose not to purchase one of the tracts of land owned by Fish Engineering. This tract of land contained settling ponds which Fish Engineering closed in 1982. Fish Engineering presently owns this tract.

Due to recent increase in business Hercules is requesting an amendment to the original permit # X13561. The increase will not affect our exemption status for emission. The emission of voc's will still be below 25T/yr.

An increase in cleaning barges has prompted Hercules request for an amended status. In 1982 Fish Engineering cleaned a total of 150 barges. Hercules presently is cleaning about 240 barges annually. This increase is primarily due to the caustic barges which we clean. Caustic cleaning attributes to approximately one third (1/3) of our total. This increase also reflect projected increases in business. Emission data in enclosed report reflects our projected increase.

Hercules maintains its strict policy concerning wind direction in connection with our residential neighbors. 7

We at Hercules appreciate all your efforts to handle this matter expeditiously. If any problems or questions arise, please contact me at our facility (409) 233-6371.

Sincerely,

Darrell Guidry/Project Manager
